

DATA HEALTH AUDIT

Enterprise Data Quality & Governance Report

OVERALL GRADE

Prepared For: Enterprise Client

Report Date: February 04, 2026

Scan ID: scan_24d91d7fafd2

Classification: Confidential & Proprietary

Executive Dashboard

Key Findings

- ✓ Data completeness exceeds industry standard (95.5%)
- 142 data quality issues identified requiring attention
- ✓ Full compliance achieved for GDPR and HIPAA regulations
- SOX compliance review recommended for access logs
- ✓ Uniqueness score indicates strong data deduplication (97.3%)
- Immediate action required on 23 critical issues

Quality Scorecard

Dimension	Score	Progress
Completeness	95.5%	95.5%
Validity	88.2%	88.2%
Consistency	91.7%	91.7%
Accuracy	94.3%	94.3%
Uniqueness	97.3%	97.3%
Timeliness	89.1%	89.1%

Detailed Analysis

Data Quality Issues Detected

The following issues were identified during the comprehensive data scan. Each issue includes severity classification, affected data points, and recommended remediation.

ID	Severity	Issue Type	Affected Field	Recommended Action
DQ-001	Critical	Missing Value	customer.email	Enforce mandatory field validation
DQ-002	High	Invalid Format	user.phone_number	Apply E.164 international format
DQ-003	Medium	Duplicate Record	transaction.id = T789	Implement deduplication workflow
DQ-004	Critical	Out of Range	product.price = -50	Add constraint: price >= 0
DQ-005	Low	Inconsistent Case	status = "AcTiVe"	Normalize to uppercase
DQ-006	High	Referential Integrity	order.customer_id invalid	Restore foreign key constraint

Regulatory Compliance Status

Regulation	Status	Findings
GDPR	✓ Compliant	All personal data encrypted at rest and in transit
HIPAA	✓ Compliant	PHI fields properly masked and access logged

SOX	■ Review Needed	Access audit logs require retention policy update
PCI-DSS	✗ Non-Compliant	Credit card data not meeting tokenization standards

Strategic Recommendations

- [Immediate] Implement field-level validation for all customer email addresses
- [Short-term] Deploy automated data quality monitoring dashboard
- [Short-term] Establish weekly deduplication jobs for transaction records
- [Medium-term] Update data retention policies to meet SOX requirements
- [Long-term] Migrate to tokenized credit card storage solution
