|--------------|-----------------------|
| Data Source: | Scan-Job-lead-job-123 |
| Records:     | 10,000                |
| Scan Date:   | 2026-02-09            |
| Status:      | Excellent             |

Executive Summary

This comprehensive audit analyzed **Scan-Job-lead-job-123** containing **10,000 records**. The data quality assessment yielded an overall health score of **94.7/100**, indicating **excellent** data integrity. No PII exposure was identified during the scan. The analysis was completed in **1.87 seconds** with automated quality checks applied across all data dimensions.

Key Insights

- Data quality meets enterprise standards
- Minimal risk to downstream analytics
- Recommended for production use
- 8 columns require attention

Strategic Recommendations

Maintain current data management practices. Establish periodic audits (quarterly) to ensure continued compliance and quality standards.
