Metric	Value	Status
Total Rows Processed	15,000	—
PII Detected	■ Alert	■
Processing Time	3.45s	—
Quality Score	87.5/100	G
Columns with Issues	8	—

Data Quality Details

Data Integrity Issues

Column Name	Issue Type	Count
Email	Invalid Format	23
Numeric Fields	Negative Values	15
Dataset	Duplicate Rows	12
Critical Fields	Missing Values	8
Date Fields	Invalid Dates	5

Quality Dimensions Breakdown

Quick Insights

■ **Good data quality.** Minor issues detected. Address flagged items to improve overall health score.

Detailed Analysis

Data Profile Overview

Attribute	Value
Data Source Name	customer_leads_db
Total Tables/Collections	5
Total Columns/Fields	42
Total Records	15,000
Data Scanned	2026-02-12

Data Quality Issues

Total of 6 columns detected with quality issues:

#	Column	Issue Type	Severity
1	email_address	Invalid Format	High
2	phone_number	Missing Values	High
3	age	Negative Values	High
4	postal_code	Invalid Format	Medium
5	customer_id	Duplicates	Medium
6	transaction_date	Invalid Date	Low

Critical & High Priority Issues

- 1. Missing values in 'email_address' column (23 rows - 0.15%)
- 2. Invalid phone format in 'phone_number' column (12 rows - 0.08%)
- 3. Negative values in 'age' column (15 rows - 0.10%)
- 4. Duplicate customer_id values detected (12 duplicates)
- 5. Invalid date format in 'transaction_date' (5 rows)

Recommendations & Action Plan

Priority	Recommended Action	Timeline
Medium	Address identified data quality issues in order of severity.	14 days
Low	Implement automated validation checks for critical fields.	30 days

About DHCaaS Platform:
DHCaaS (Data Health Check as a Service) is an enterprise-grade data governance and quality monitoring platform. We help organizations ensure data reliability, compliance, and trustworthiness through advanced automated analysis and reporting.
