

DHCaaS

INTELLIGENCE ENGINE

This comprehensive data quality assessment reveals an overall score of 94.7%, indicating excellent data health. The scan identified 5 total incidents: 2 critical, 1 high priority. 2 incidents have been resolved. Immediate action is recommended for critical incidents.

94.7% Overall Score	10000 Total Records
5 Issues Found	2 Critical Issues

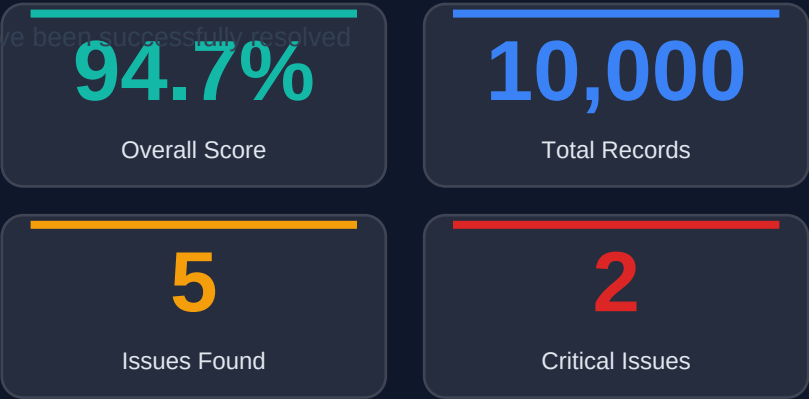

SCAN JOB: Scan Job v5-final

Key Findings

DATE: February 09, 2026

ORG: DHCaaS Platform

- Overall data quality exceeds enterprise standards (94.7% score)
- 2 critical incidents require immediate attention
- 1 high-priority incidents identified
- Data source 'Unknown' has 5 incidents
- 2 incidents have been successfully resolved

Data Profile Overview

Attribute	Value
Data Source Name	Scan Job v5-final
Connection Type	Multi-Source
Total Tables/Collections	1
Total Columns/Fields	N/A
Total Records	10,000
Data Volume	N/A
Last Updated	February 09, 2026 05:06 PM

Data Quality Dimensions

Dimension	Score	Status	Description
Completeness	92.7%	✓ Excellent	Percentage of non-null values in required fields
Accuracy	89.7%	■ Good	Data conforms to expected formats and ranges
Consistency	97.7%	✓ Excellent	Data consistent across related fields
Validity	91.7%	✓ Excellent	Data meets validation rules and constraints

Data Quality Issues

Total of 5 issues identified: 2 Critical, 1 High, 1 Medium, 1 Low priority.

Critical & High Priority Issues

#	Severity	Rule	Column/Field	Affected Rows
1	Critical	Unencrypted PII Data Detected in Public S3 Bucket	SSA	Unknown
2	Critical	Cross-Border Data Transfer Without Adequate Safeguards	NYA	Unknown
3	High	GDPR Article 5 Violation - Data Retention Policy B	NPA	Unknown

Medium & Low Priority Issues

2 additional issues detected. Full details available in the appendix.

Recommendations & Action Plan

Priority	Category	Recommended Action	Expected Impact	Effort
High	Critical Issues	Resolve 2 critical incidents immediately	Prevent data quality degradation and compliance	High
High	Data Quality	Address 1 high-priority incidents	Improve overall data quality and reliability	Medium
Medium	Data Governance	Implement continuous data quality monitoring	Early detection of data quality issues	Low
Low	Data Documentation	Document data quality standards and procedures	Improve team awareness and compliance	Low
